

As a citizen of Indiana, and someone who pays for phone service and enjoys privacy and not receiving hundreds of sales calls that should be called harassment, I am against 02-278. It should be a right not to receive all kinds of calls that no one ever wants. I've never bought anything over the phone and I don't know anyone who has. A telemarketer is the most hated, unwanted, and ineffective type of salesperson and their very existence should be illegal. The right to privacy is peripheral in the Constitution and should include harassing salespeople. Please do not allow this pathetic breed of salespeople to violate the privacy of millions who do not want the constant and incessant harassment.
